

EXTREM polishing line, developed by MERARD R&D team, meets very specific expectations for extreme configurations.

Extremely technical and precise solutions to solve **highly specific requests**:

- **Ceramic coatings**
- Final finish of **PVD treatments** (Physical Vapor Deposition)
- Polishing of **high-hardness metals**
- **Mineral glasses**
- **Platinum finish polishing**

## MERARD NEW ABRASIVE CONCEPT

EXTREM compounds are made with a new abrasive material, **CERAX**, developed by **MERARD**, based on a unique combination of ceramic and diamond components.

EXTREM line includes 5 different solutions with characteristics that have been specifically designed to ensure **profitability** and **performance** for complex polishing configurations.

## SOLID COMPOUNDS

REFERENCES	PHASES	POLISHED SURFACES	ASSOCIATED BUFFS
EXTREM S10	Preparation	Ceramic, platinum, high-hardness metals, hardening steels (Durnico®)	Traditionnal MERARD buffs
EXTREM S20	Finishing		
EXTREM S30	Super finishing		

## DIAMOND FAT FREE SUSPENSION

REFERENCE	PHASES	POLISHED SURFACES	ASSOCIATED BUFFS
EXTREM L50	Revives the shine quickly, mirror polished result, degreasing without constraint.	High-hardness metals, PVD, ceramic, cobalt chrome...	Flannel brush

## DIAMOND GEL 30µm

REFERENCE	PHASES	POLISHED SURFACES	ASSOCIATED BUFFS
EXTREM G05	Removes surface scratches on mineral watch glasses.	Mineral glasses	Felt on stem or felt disc
