EXPERTISE, INNOVATION & BROAD RANGE

For more than a century, the French manufacturer, MERARD, has developed its know-how in the north of Lyon.

Drawing upon its textile manufacturing heritage, in the 1950s the company embarked on the manufacture of buffing mops, then liquid and solid polishing compounds.

Present on the traditional and high-end markets, MERARD constantly develops innovating polishing solutions to meet all your requirements, from the simplest to the most demanding.

Across Europe and all over the world, we serve and advise

MERARD liquid, solid or cream polishing compounds, buffing mops and polishing accessories are intended for **a wide range of trades** for the preparation, polishing or finishing of **numerous surfaces**, for **standard or expert polishing operations**.

SOLID POLISHING COMPOUNDS

The solid polishing compounds are divided into two categories:

- **Expert polishing:** for all highly demanding configurations such as mirror finish, high hardness metals, almost zero roughness, etc.
- **Standard polishing:** for traditional polishing of all surfaces in industry or workshops, where productivity and cost reductions are major stakes.

EXPERT RANGE

HIGH QUALITY POLISHING • P.11

Suitable for **highly demanding polishing operations**, the polishing compounds in the Expert range offer exceptional polishing characteristics and guarantee a

LUXOR®

HIGH-END POLISHING • P.13

- high-end line of polishing compounds and buffing mops
- complete range from preparation to mirror finish
- fast results

LUXOR

HRLINE

ESSENTIEL

ULTRA-VERSATILE POLISHING • P.15

- complete line of polishing compounds and buffing mops
- excellent results, mirror finish
- highly versatile on all metals

ESSENTIEL

EXTREM
